

ABSTRACT

AL-IIIIC-161

MASON-DIXON LINE: MILESTONE NO. ---(166)

Cumberland, Maryland vicinity

Public/private

1766/1767 (area surveyed/marked)

1902 (new monument set at additional site)

Milestone No. ---(166), north of Cumberland on Valley Ridge about 5250 feet west of the preceding monument No. ---(165) on Shriver Ridge, marks an additional point on Mason and Dixon's West Line about 155 horizontal miles west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. It is a very plain dressed Cockeysville marble monument with a low pyramidal top, of the same design and source as 65 other new monuments set during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary west of Sideling Hill. It is in excellent condition, unaltered, firmly set; measures about 10 inches square by about 17 inches high above ground; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, and the year 1766 (when this area was preliminarily surveyed) on the east side, and 1902 (when this new site was first monumented) on the west side. No. ---(166) is significant on the national and state levels primarily as one of the thematic group series of some 248 markers still visually defining the West Line, the boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. Locally, as one of 37 monuments marking the present Allegany/Fulton-Bedford-Somerset county boundary, it is also significant symbolically for its identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(166) was a new dressed ^{with a low pyramidal top} Cockeysville marble monument/when set in 1902 at an additional site on Mason and Dixon's West Line during the course of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is in excellent condition, firmly set, unaltered; measures 10 inches square by about 17 inches above ground; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, and the year 1766 (when this area was preliminarily surveyed) on the east side, and 1902 (when this new site was first monumented) on the west side.

The area here ^{sparsely settled at} is ^{the} southern tip of a narrow ridge called Valley Ridge ^{by the Resurvey} parallel to and at the eastern edge of Wills Mountain, running generally southwest/northeast, and north of the City of Cumberland. The site is within Election District 5 of Allegany County, MD, and Cumberland Valley Township of Bedford, PA; ^{about 5250 feet west of the preceding monument No. ---(165)} about 3/2 miles northeast of the city limits of Cumberland and about at the 155-mile tick on Mason and Dixon's 1768 map (distance from the northeast corner of Maryland, the beginning of their West Line). It is at a point about 400 feet west of Valley Road/T-300 and about 25 feet south of the old pipeline, in a lovely mossy woodland stretch used as a hiking trail. It cannot be seen from any road or pipeline, but ^{is} easily seen from closeby and is apparently well protected by its obscure site.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill along the Maryland-Pennsylvania boundary, was quarried and carved in Cockeysville, MD, of a white, fine-grained marble called saccharoidal dolomite or magnesian limestone; was originally cut about 10 inches square by about 4 1/2 feet long, intended for setting about 1 1/2 feet above ground, with the remaining 3 feet for setting firmly into the ground when possible. The letters and numbers are blocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the planes and apex of the top are all clear and intact except for minor chips ^{northwest and southwest} at the top/corners.

(see Thematic Group National Register nomination form for full descriptions of the several styles of new monuments set in 1902 and the Resurvey method of securing these)

STATEMENT OF SIGNIFICANCE

Milestone No. ---(166) is significant on the national and state levels primarily as one of the some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This part of the Line was preliminarily surveyed in 1766, marked at irregular intervals with cairns and additional wood posts the following year, and the present site on the Line established and monumented in 1902 with a new Cockeysville marble marker during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of 37 markers along the present Allegany/Fulton-Bedford-Somerset county boundary, No. ---(166) is also significant for its identifiable relationship to the colonial and Civil War heritage of these counties.
